

# Estándar de programación. Píldora sellador

## Duración

15.5 horas

## Objetivos

The training will consist an explanation of the Kuka gluing technologies, problems derivate from this technology, knowledge of SCA systems and how to configured them in the robot, knowledge of how to program the sealer beads. The target will be to provide

## Contenido

- Overview and knowledge to the Kuka gluing technology to can follow the training and have a better knowledge.
  - o Knowledge of the sealer technology.
  - o Explanation of Sealer instructions and commands.
- Configuration of analogic signals on work visual.
- C
- Correct programming of movements and programs of the robot.
- Knowledge of the SCA system 6000 with the robot for a correct configuration.
- Calibration of opening and close of the nozzle in the robot.
- Configuration of correct velocities on robot to w
